

Job Opportunity – Utility Worker (Temporary up to 90 days)

Your Opportunity

Capital Power is always looking for hard working individuals for our Genesee Generating Station, who have a safe work record and a proven ability to work collaboratively in a team environment for our upcoming opportunities as a Utility Worker. These opportunities mostly will be Temporary up to 90 days positions.

Working under the direction of the Mill Maintenance/Support Service Manager, duties may include, but are not limited to lubrication of equipment, assisting Maintenance personnel in repair work and cleanup duties using various types of equipment and filling in for tool crib and stores requirements.

If you would like to join our Genesee team and be considered for future opportunities, please consider submitting your resume to rsingh@capitalpower.com with a subject line ***“Application For Utility Worker– PFN”***. When a new position becomes available, we will contact you directly at that time to review the opportunity in more detail. As such, you may not hear back from us immediately.

You will contribute to our team by

- Manually removing coal and ash deposit levels throughout the plant and general plant cleanup and wash down.
- Actively participating in hazard and Near Miss Hazard identification program.
- Reporting any safety deficiencies or unusual occurrences to the appropriate supervisor.
- Ensuring tools and equipment are maintained in a useable state.
- Maintaining high standard for managing the ICT team storage areas.
- Acting as a man watch and fire watch and following all safety procedures.
- Taking part in team and safety meetings, tailboards and bring ideas for improvement to their foreman or supervisor.
- Being open minded and ready to learn new tasks.
- Learning problem solving skills while progressing through the different areas of the plant.
- Having a solid understanding of site policies and procedures.
- Collaborating with journeymen and apprentices in the millwright and other trades.
- Working with site contractors during special projects or turnarounds.

What you will bring to the role

Education:

- High School Diploma

Experience:

- Related labour/construction experience an asset

Technical Skills:

- Certified heavy equipment operator preferred a valid Class 5 Driver's License.
- Related labour/construction experience will be considered an asset.
- You have a proven track record for safety and teamwork and strong interpersonal skills.

Working Conditions:

- Heavy industrial facility designated as a safety sensitive location.
- Physical mobility and ability to use PPE required.
- Multi-union/out-of-scope work force.
- May be working in high temperatures (+30 C) under which coal dust levels can require wearing a form fitting respirator while completing tasks.
- May be subject to tasks that require a worker protection system for lockout areas (which usually means a confined space) and required to develop a safe work plan for dangerous areas of the plant which can require suiting up with fall protection equipment and developing a rescue plan in the event of an emergency.
